BETTY HARDEN

ADM ASST & TREAS

January 27, 1987

State Water Resources Control Board
Division of Water Rights
P.O. Box 2000
Sacramento, CA 95810

Gentlemen:

Enclosed are "Supplemental Statements of Water Diversion and Use" for the Buena Vista Water Storage District covering the years 1984, 1985 and 1986.

The statement for 2nd Point of Measurement which is the historical point of measurement for all Kern River waters that were tributary to Buena Vista Lake and/or Buena Vista Water Storage District includes, in addition to District diversions, Kern River waters being diverted to the California Aqueduct by the Intertie structure and Kern River Flood Channel flows in large runoff years.

Additionally, we have included statements for the three points of diversion the District uses to take water from the Kern River Channel.

This District's exchange agreements with water districts in the Bakersfield area whereby they take delivery of Buena Vista Kern River water upstream of 2nd Point and Buena Vista in exchange takes delivery of their State entitlement water from the California Aqueduct amounted to some 56,800 acre feet in 1984, 66,800 acre feet in 1985, and 66,500 acre feet in 1986. This Kern River water is not included in the above statements.

Yours very truly,

BUENA VISTA WATER STORAGE DISTRICT

H. K. Russell

Engineer-Manager

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

Gentlemen:

Enclosed are "Supplemental Statements of Water Diversion and Use" for the Buena Vista Water Storage District covering the years 1987, 1988, and 1989.

In addition to the statement for 2nd Point of Measurement which is the historical point of measurement for all Kern River waters that were tributary to Buena Vista Lake and/or Buena Vista Water Storage District, we have included statements for the three points of diversion the District uses to take water from the Kern River Channel.

This District's exchange agreements with water districts in the Bakersfield area whereby they take delivery of Buena Vista Kern River water upstream of 2nd Point and Buena Vista in exchange takes delivery of their State entitlement water from the California Aqueduct amounted to some 44,600 acre feet in 1987, 39,500 acre feet in 1988 and 37,000 acre feet in 1989. This Kern River water is not included in the above statements.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

April 6, 1993

State Water Resources Control Board
Division of Water Rights
P.O. Box 2000
Sacramento, CA 95810

Gentlemen:

Enclosed are "Supplemental Statements of Water Diversion and Use" for the Buena Vista Water Storage District, covering the years 1990, 1991 and 1992.

In addition to the statement for 2nd Point of Measurement, which is the historical point of measurement for all Kern River waters that were tributary to Buena Vista Lake and/or Buena Vista Water Storage District, we have included statements for the three points of diversion the District uses to take water from the Kern River Channel.

This District's exchange agreements with water districts in the Bakersfield area, whereby they take delivery of Buena Vista Kern River water upstream of 2nd Point, and Buena Vista in exchange takes delivery of their State entitlement water from the California Aqueduct, amounted to some 20,372 acre feet in 1990, 0 acre feet in 1991, and 17,054 acre feet in 1992. This Kern River water is not included in the above statements.

Yours very truly,

BUENA VISTA WATER STORAGE DISTRICT

Martin Milobar

Martin N. Milobar

STATE OF CALIFORNIA
THE RESOURCES AGENCY
STATE WATER RESOURCES CONTROL BOARD
DIVISION OF WATER RIGHTS
STATEMENT OF WATER DIVERSION AND USE

\$ 1466

This statement should be typewritten or legibly written in ink.

- A. Name of person diverting water Buena Vista Water Storage District
Address P.O. Box 756 Buttomwillow
- B. Name of body of water at point of diversion Kern River
Tributary to Buena Vista Lake Reservoir
- C. Place of diversion SW 1/4 Sec 32 T30N R25E Mt. Diablo M.
Kern County, or locate it on sketch of section and on survey map with regard to section lines or prominent local landmarks.
- D. Name of works Inlet Weir

- E. Capacity of diversion works 2000 CFS cubic feet per second
Capacity of storage reservoir 30,000 Acra Feet acra-foot
State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1967	27602					24470	12656	4085	7482	16030	619	4439	103,124 A.F.*

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.

Maximum annual water storage 30,000 Acra Feet gallons
Minimum annual water storage 0 acra-foot
Type of diversion facility gravity X, pump
Method of measurement: weir X, gage, electric power meter, water meter, estimate

- F. Purpose of use (what water is being used for) Storage for subsequent irrigation of crops

- G. General description or location of place of use (use sketch of section and on reverse side if you desire)
Irrigated lands within Buena Vista Water Storage District

- H. Year of first use as nearly as known

- I. Name of person filing statement H. K. Russell
Position Manager Organization Buena Vista Water Storage District
Address P.O. Box 756 Buttomwillow, California

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.

Date signed 12/31/68 Signature H. K. Russell
